DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3,5,8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rossi et al 6,050,405.

Rossi et al teach golf club locking device (Figures 2,3) comprising a first link member 100 and a second link member 200 pivoted together with a forked connection 122,124,132/232,234,225 and having cutouts 102,202 to encompass golf clubs therein.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rossi et al '405. OFFICIAL NOTICE is taken that the use of a lining material such as felt to prevent marring of surfaces is well known in both the lock art and the golf bag art, thus

would have been obvious to one of ordinary skill in the art to provide the Rossi device with a material lining to protect the golf club surfaces from damage.

Allowable Subject Matter

5. Claims 4,6,7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The plurality of links forming a chain, including a third link as set forth in claim 4, and an additional link with an eyelet as set forth in claim 6, is not taught or suggested by Rossi et al or the prior art of record.

Allowable Subject Matter

6. Claims 10-18 are allowed.

The prior art of record fails to teach the embodiment of Figure 4 which includes a front flat surface and non-planar rear flat surface on each link member, rather than the forked embodiment of Figure 1 which is taught by Rossi et al.
